

# DICE BATTLE X

## Rules

- ❖ Each player starts out with 10 Dice.
- ❖ To determine who goes first each player rolls 1 die and the lowest number goes first.
- ❖ A player rolls a die and puts it into one of the squares. If the die placed makes the total of the row, column, or the diagonal row of 5 add up to 10 then the player gets to take those dice off of the board. If not, then the player lets the other player know it is their turn. If a player notices there is a total of 10 on the board that the other player missed they may take it to add to their pile and then play their die.
- ❖ The game goes until a player has no more dice or there are no more spots on the board to play.
